

# Aperi Roadmap

## Eclipse Aperi Storage Management Project

# Aperi Roadmap

- R1
  - Open, standards-based framework
  - Initial IBM contribution
    - Topology viewer
    - Disk storage discovery, reporting, alerting, and management via SMI-S
    - Tape library discovery and reporting via SMI-S
    - Fabric topology discovery, reporting, alerting, and zone configuration via SNMP, GS3
    - Filesystem capacity reporting via host agent
  - Downloadable and demo-able
  - Community evaluation
- R2
  - Componentization of architecture
    - Reuse of Aperi framework components in other applications
  - Extensibility through Eclipse Platform
    - Dynamic plug-ins extend framework
- R3
  - Initial Eclipse Rich Client Platform GUI
    - Refactored GUI using dynamic plug-in architecture
    - Topology viewer plug-in
    - Custom report designer from Eclipse BIRT project
- R4
  - Broad SMI-S profile support
    - SMI-S Fabric & Switch profiles
    - SMI-S NAS profile
  - Unified Storage support (FC, NAS composite view)
  - Rich set of data and control operations across multiple vendors' hardware
  - Complete Eclipse RCP GUI

# Future Work Items

---

- These items are of interest to the community but are not associated with a roadmapped release yet
  - IP storage support
  - Additional SMI-S support
    - SMI-S Virtual Fabric subprofile
    - BSP profile
    - Performance statistics for unified storage via SMI-S
    - Host profile
  - CLI
  - Remote install & upgrade of host agents
  - Role-based access control – finer-grained role definition and application to profiles
  - Increased support for storage virtualization (beyond inband virtualizer)
  - Application awareness
